Mobile Workflow Management

Mobile Valuations Advantage

Cut Cycle Time, Improve Quality, Boost Productivity, Deter Fraud

Efficient Field Operations with SLUICE

Data harvesting for any inspection or valuation assignment - boosting the efficiency and accuracy of information around collateral in the field.

SLUICE is a custom-built commercial workflow application that incorporates cloud services and integrated client back-end systems, which are easily customizable to meet a diverse set of customer workflow and work tracking requirements.

With the SLUICE mobile app, you can assign orders to vendors directly in the field, enabling them to manage their orders, communicate in real-time with their team, and securely capture photos while completing forms within the app.

Uninterrupted order completion with SLUICE, even offline

Once an order has been accepted into SLUICE, the contractor can complete the order in the field, even if Cell or Wi-Fi services are unavailable.

Completed orders can be submitted when back online without any loss of work. Not being dependent on cellular coverage or Wi-Fi speeds up the delivery of assignments and more accurate data input while on site.

All data collected is logged and verified including photo location to minimize fraud.

- 0.5
a day in acceptance of orders

- 1.4
day reduction in total cycle time

+ improved
first submission quality

- Reduction
in rework due to vendor errors

Business Benefits

Proven Gains in Productivity

Fast, easy, and reliable evaluations can be completed at the property location in just minutes.

Integrated & Customizable

Use SLUICE off the shelf, or fully customize it to your workflow. Either way, it integrates with your backend for a seamless experience.

Increased Profitability

Inherent cost reductions will bolster your bottom line. The accelerated workflow cuts time on site, increased job accuracy lessens rework, and order clustering reduces driving time.

Fraud Prevention

All proof-of-work photos are cryptographically signed and contain embedded location, time, and device metadata, eliminating the fraudulent use of old or stock images.

Use SLUICE off the shelf, or fully customize it to your workflow. Either way, it integrates with your backend for a seamless experience.
